

## Future Roadway Connections

**1. Complete Phase One of Southeastern Connector Road:** Connect Big Oak Lane Route 340; realign Lakewood Road at Lakewood's intersection with Mill Creek Road. (see page 48)

**2. Connect and Improve Butler Lane:** Pave Butler Lane and construct curb, gutters, and sidewalks. Connect Butler Lane to Menefee Street as shown on Luray Heights' Master Land Use Plan.

**3. Connect Stoney Brook Lane to Collins Avenue:** Connecting Stoney Brook Lane to Collins Avenue would give a needed alternative point of egress and ingress for residential and commercial traffic using Stoney Brook Lane.

**4. Connect Fairview Road to Creekside Drive:** A road connecting Fairview Road and Creekside Drive should be considered due to the large amount of undeveloped residentially-zoned land in this area. It is envisioned that such a connection should be considered at the time that a development is proposed for this area.
